# Match Play Golf Course Turf Colorant

Painting vs. overseeding? Match Play Turf Colorant saves time, money and water.

Avoid the transition period with the company that is #1 in turf paint. Match Play turf colorant is more durable, affordable and offers a variety of natural colors.

## Match Play™ Turf Colorant

Introducing an array of golf course turf colorants made specifically for golf courses as an alternative to overseeding with perennial ryegrass. Our colors were developed through a combination of academic research and practical application, creating consistent colors that will not fade to blue.

## Match Play™ Temporary

- Turf dye for those who overseed with perennial rye grass
- Temporary green color to bridge the gap during the grass transition period
- Concentrate available in 1 gallon pail

## MatchPlay™ Colors:

Custom colors available!

### Consistent Turf Color

Match Play colors allow you to choose consistent colors to maintain contrast between greens, collars, tees and fairways.

### Water Conservation

Match Play colorized turf requires far less water than overseeded perennial ryegrass.

### No Transition Problems

Bermuda grass will green up sooner and more consistently in the spring without competition from perennial ryegrass and poa trivialis.

### Sustain a Stronger Strand

Overseeding over long periods of time can create a weaker strand of bermuda grass.

### Lower Maintenance Costs

Eliminate direct cost of seed as well as the indirect maintenance costs of mowing, fertilizing, watering and applying herbicides and pesticides.

# Match Play Golf Course Turf Colorant

Match Play Turf Colorant accessories, Pioneer turf paints and equipment!

## MAX™ Aerosol

- MAX uses premium pigments and a rich formula for more prime hiding
- Brilliant colors and eye-stunning white
- Jumbo size can means more time painting, less time changing out cans
