## PLeeFiX™

- UV-resistant synthetic turf tufts
- Fibers available in white, red, blue, yellow, orange, and green
- Recycled polypropylene spiral cone base
- Use to mark sprinkler heads and other potential field hazards
- Eliminates the need to re-measure natural grass fields prior to painting
- Can be used on sports fields for football, soccer, lacrosse, field hockey, rugby, baseball/softball, track and field, and golf
- Highly visible and mower resistant

## PLeeFiX™ Marker

### **THE MOST ADVANCED GROUND MARKING TOOL.**

The PLeeFiX™ ground marking tool is easy-to-install, time-saving, highly visible, mower resistant, and non-removable.

The PLeeFix™ marker is planted in the soil on football, soccer, lacrosse, field hockey and rugby fields. Its different color synthetic grass tufts are UV-resistant fibers attached to a tough, recycled polypropylene spiral cone base.

Watch the installation video at:  
[pioneerathletics.com/pleefix](http://pioneerathletics.com/pleefix)

**Install in just 3 easy steps:**

**For use on the following sports fields:**

FOOTBALL

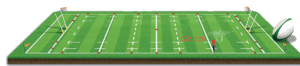

SOCCER

LACROSSE

FIELD HOCKEY

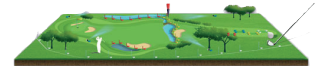

RUGBY

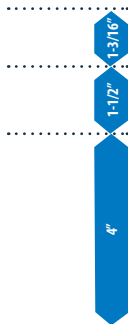

BASEBALL/SOFTBALL

TRACK AND FIELD

GOLF

**Fibers:** Treated synthetic tufts, UV and mower resistant, highly visible colors.

**Sand:** Poured on after planting to fill space between fibers and increase the resistance of the PLeeFix™ marker.

**Spiral Cone:** Spiral cone is made of recycled polypropylene and is difficult to remove once installed.
