

HOW TO 101:

STRIPING A FIELD WITH AN AEROSOL STRIPER

1

Line your target area using string and stakes.
**Gawryla Grip for synthetic turf.*

2

Shake can vigorously and test shot with spray.

3

Load can into machine.

4

Loosen the adjustment wing nuts to set height of spray. Tighten when done.

5

Utilize the arrow on the machine which indicates the center of your spray.

6

Use the spray reference guide on backside of machine.

7

Test shot.

8

Choose between: Outside of the string, middle of the string or inside of the string.

9

Now you are ready to paint!
